

PROFESSIONAL ENGINEERS AND LAND SURVEYORS

Cornette Engineering Services (CES) is a multi-faceted firm that specializes in many aspects of Civil Engineering. Our services include design and layout of bulk material handling facilities, industrial railroad siding, structural design of steel and concrete structures, and a full-time drafting team. CES is involved with many projects throughout the area including Kentucky, Indiana, Illinois, Missouri, Iowa, and South Carolina. We are a growing company and always looking for quality people to join our group as the demand for our services continue to grow.

Job Description:

Civil/Structural Engineer will be involved with the planning, design, and coordination of many types of steel and concrete structures. These designs range from truck loadouts, conveyors and trusses, and transfer structures to underground concrete railcar unloaders and foundations. Position will require the engineer to produce new ideas and thoughts on a daily basis.

Requirements:

- BS in Civil Engineering or related degree from an ABET accredited school
- Currently possess or on path for PE or SE
- General knowledge with structural analysis software and AutoCAD

Benefits:

- Position offers excellent salary, health care, profit sharing, and 401(k).
- Location offers great access for daily commute from the surrounding area
- Access to company vehicles
